The Origin

Crack!* *Crack!* *Crack!

At the verge of extinction, few eggs in a strange Metaverse hatchery, who were abandoned a million years ago by a tribe of advance reptilian race, start to hatch!

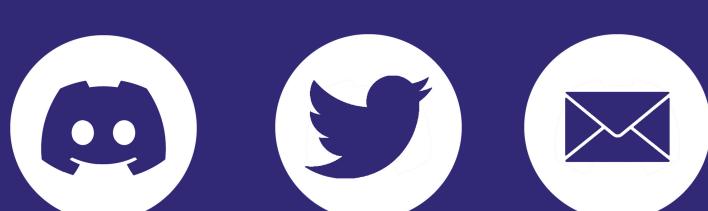

You are surprised witnessing some unusual traits and powers. Glowing & radiating, they struggle their way out with light-sabers & knives. You're scared to approach them. Yet curious to know more, you find out on your Star Atlas, that their tribe is still out there in the Solana Metaverse.

On a mission to get them to their civilization you adopt them and embark on a 10 year journey through time and space.

MyEggs

MyEggs

MyEggs are collectible computer-generated non-fungible tokens with evidence of ownership recorded on the Solana Blockchain.

Generative NFTs

5,555 unique generative NFT's make up for the entire narrative. This gives holders to take part in a pre-sale or competition based entry into the MyEggs realm.

Team

A team of artists, designers, developers, marketers and community management members are all involved to build, grow and nurture the project throughout time.

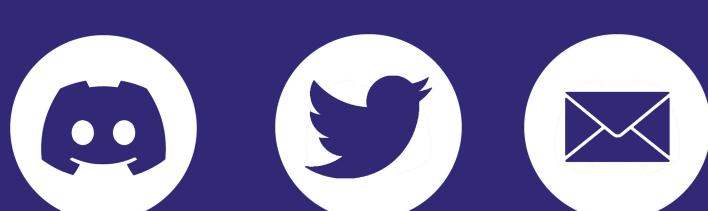

Goal

A game staking mechanism using the Star Atlas gaming build on the Solana ecosystem. Starting off with versus fighting games which allows players and spectators to bet SOL and win along the way.

Roadmap

STAGE 1 - CONCEPT - Q4 2021

The concept of 5,555 MyEggs starts to emerge. The founders bring together a team of a talented artist and developers to make the project alive.

STAGE 2 - LAUNCH - Q1 2022

Developing rarity distribution and planning different attributes with a set percentage to include various rarities for future adopters.

Release 5,555 MyEgg's on the Solana blockchain.

Date/Time will be mentioned accordingly on the website

STAGE 3 - LISTING - Q1 2022

List on all major marketplaces after launch so that all MyEggs adopters are able to trade in different Solana marketplaces.

Targetted marketplaces: Solsea, Solana Art, Digital Eyes

STAGE 4 - COMMUNITY BUILDING - Q1 2022

Out of 5,555 MyEggs NFT's on the Solana Blockchain, 100 eggs will be given away to influencers for marketing purposes.

55 eggs will be kept aside for VIP's as token of appreciation of their efforts in building the community.

Stage 5 - Q1 2022

25% of all royalties from trading fees will be sent to a mutual wallet. MyEgg's holders will be able to vote to choose which cause they'd like to support.

Stage 6 - Q1 2022

Starting game staking mechanism using the Star Atlas gaming build on the Solana ecosystem. Starting off with versus fighting games which allows players and spectators to bet SOL and win along the way. Beta version releases will only allow holders to setup a play to earn account giving them more opportunities in the future

Stage 7 - Q2

3 Months down the line a roadmap update will be generated for MyEggs to safely return to their civilization. The developers will take the responsibility to ensure that every egg reaches its destination. Revision of plans along the way will bring more value to the initial holders of the project.

Stage 8 - Q2

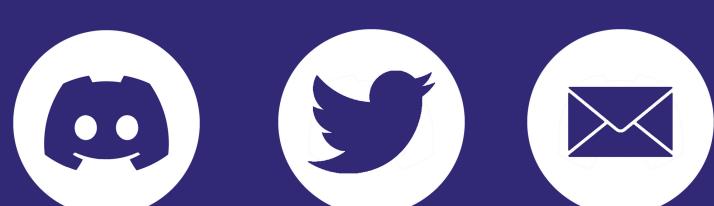

Based on the community, we'll be then introducing new avenues to holders in the Solana Metaverse. Giving them further more opportunities such as breeding, gaming, token and betting options.

Solana Ecosystem

Why Solana?

Solana is the world's fastest blockchain and cryptocurrency ecosystem, with over 500 projects from DeFi, NFTs, Web3 and more.

Transaction fees

Solana was chosen because its transaction fees are lower than that of Ethereum. For our investors we want a hassle free network without worrying about incurring fees.

Transaction Rate

Solana transactions are faster than Ethereum transactions, with 50,000 or more transactions per second (TPS) compared 15 to 45 TPS for Ethereum.

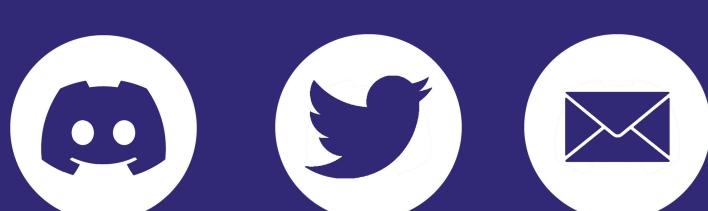

Opportunity for Growth

It is logical to think that by developing projects on Solana, a much younger network than Ethereum, we would be able to grow and broaden our exposure to the cryptocurrency sector.
